

Interactive Education Workshops
Shigeko Sasamori and Dr. Kathleen Sullivan
28 April – 9 May

-
In-Security – The Nuclear Dilemma
International Red Cross and Red Crescent Museum, Geneva
February 27th to July 29th, 2008

Dear Educators,

As you are perhaps already aware the prestigious International Red Cross and Red Crescent Museum, Geneva will shortly be presenting a new and highly comprehensive exhibition on nuclear technology entitled '*In Security - The Nuclear Dilemma*'. Mrs Shigeko Sasamori, a survivor of the atomic bomb and myself will be in Geneva between the 28 April – 9 May to attend the Nuclear Non-Proliferation Treaty conference taking place at the United Nations and would like to take this opportunity to organise an interactive two hour workshop with your school.

Developed in collaboration with the United Nations Department for Disarmament Affairs, this in-class workshop, will help students understand the immense, destructive power of nuclear weapons; and encourage the use of students' imagination to build a more peaceful world.

Attached is a brief description of who we are and what the workshop (in English) covers. If you are interested please contact either Marie-Dominique de Preter (md.depreter@micr.org) or H el ene Leneveu (helene@realexpo.org) for more information.

Yours sincerely

Dr. Kathleen Sullivan
